

GA4 Funnel Analysis - Google Merchandise Store

Nov 2020 – Jan 2021 | Source: BigQuery Public Dataset | Only 0.71% of visitors purchase. Here's why.

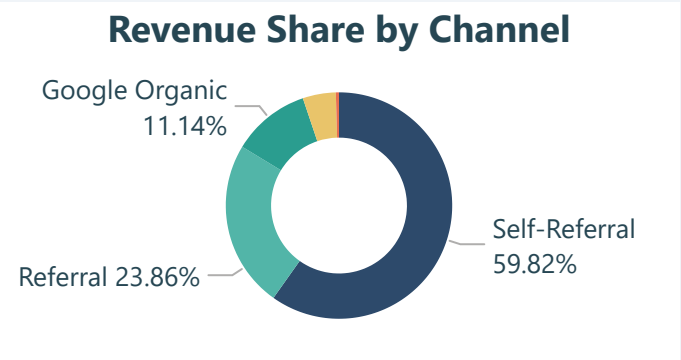

Despite 28,018 sessions over 3 months, only 198 resulted in a purchase. The funnel below shows exactly where visitors are dropping off.

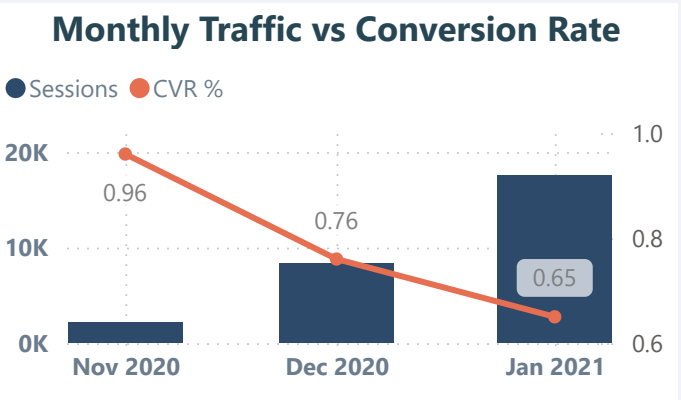

83% of visitors never view a product. The real funnel begins at View Item.

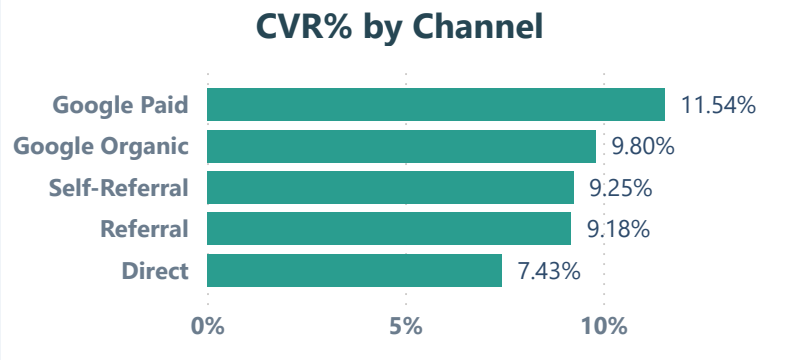

Note: Session Start (27,901) excluded from chart — 83% drop to View Item makes lower stages unreadable at same scale.

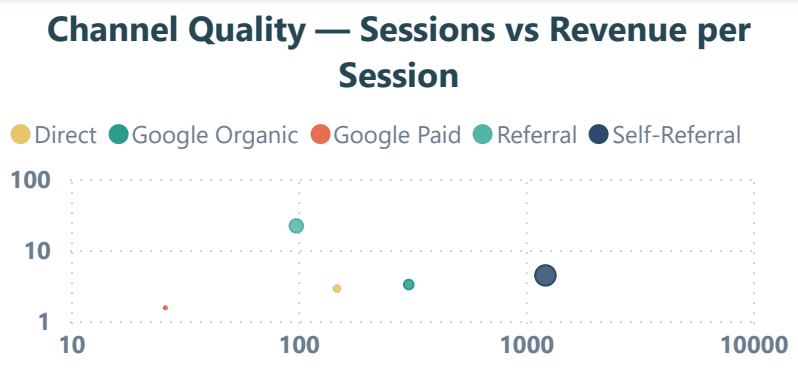

Direct (4.7%) and Google Paid (0.4%) too small to display — combined \$465 revenue

Sessions grew 8x from Nov to Jan — but CVR fell from 0.96% to 0.65%. More traffic ≠ better quality.

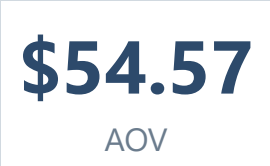

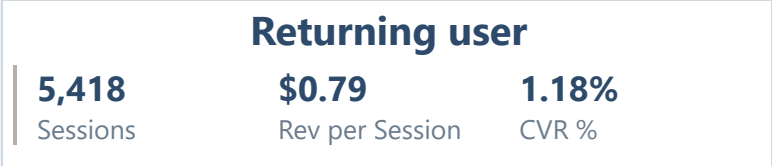

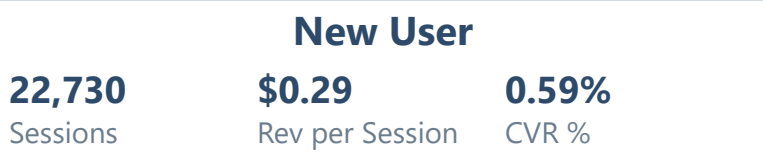

Google Paid has highest CVR (11.54%) but only 3 purchases — statistically insignificant. Google Organic is the strongest real channel at 9.80%.

Referral generates \$21.90 per session — 14x more than Google Paid (\$1.54).

Are We Attracting The Right People?

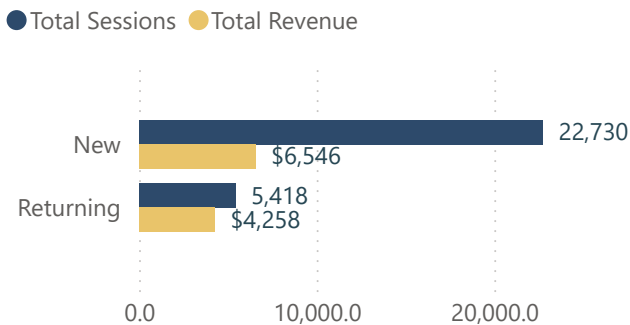

Returning users are 19% of sessions but generate 39% of revenue — and only 16.88% of sessions engage with the funnel beyond their first event

Returning users convert at 2x the rate of new users — yet 81% of our traffic is first-time visitors.

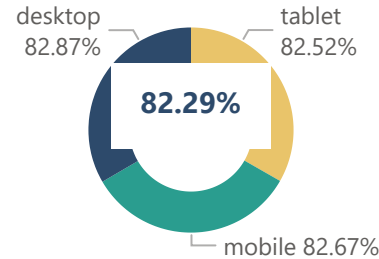

% of sessions that went beyond session_start

New vs Returning — Sessions & Revenue

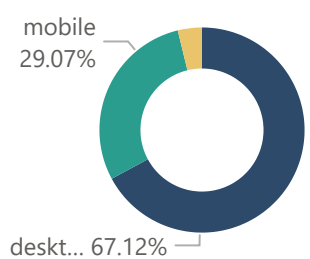

Returning users generate \$4,258 from 5,418 sessions vs new users' \$6,546 from 22,730 sessions — 4x more sessions but only 1.5x more revenue.

Bounce Rate by Device

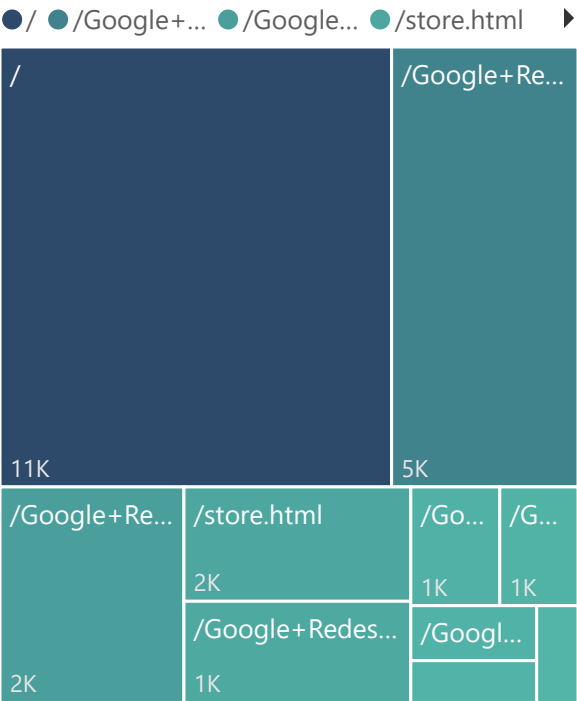

Bounce rate is identical across all devices (~82%) — the problem is traffic quality, not mobile UX. Yet desktop generates 67% of revenue from 58% of sessions, while mobile underperforms on revenue despite driving 40% of traffic.

Revenue by Device

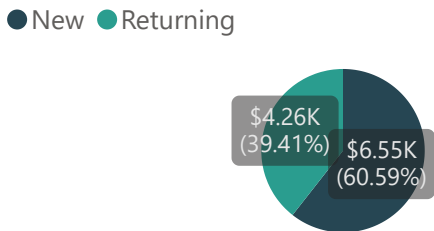

Top 10 Entry Pages — Where Sessions Begin

Homepage drives 11K entries but Apparel category drives 5K — these visitors arrive with purchase intent already formed.

Revenue Share — New vs Returning

39% of revenue from 19% of sessions — returning users punch well above their weight.

Bounce Rate by Country

country	Total Sessions	Total Revenue	Bounce Rate %	CVR %
United States	12,419	\$5,083	82.59%	0.64%
India	2,686	\$1,219	83.88%	0.78%
Canada	2,112	\$965	84.23%	0.99%
United Kingdom	893	\$222	84.21%	0.56%
France	549	\$285	81.60%	0.73%
Germany	542	\$138	83.39%	0.55%
Spain	512	\$305	83.79%	1.37%
China	490	\$701	80.61%	0.61%
Taiwan	482	\$26	84.02%	0.83%
Italy	409	\$0	81.42%	0.49%

China & France show lowest bounce (~81%). Spain converts despite 83.79% bounce. Italy: 409 sessions, \$0 revenue — needs investigation.

What Are They Buying?

Apparel drives 47% of revenue — but it's seasonal. November to January revenue fell 60%.

Google Zip Hoodie F/C	\$13,788
Top Product	Top Product Revenue

Top 5 item category -Revenue, Orders & AOV

Item Category	Revenue	Orders	Quantity	AOV
Apparel	\$1,71,727	4,984	5,447	\$34.46
New	\$25,813	1,445	2,132	\$17.86
Bags	\$23,860	704	1,053	\$33.89
Campus Collection	\$20,061	1,497	2,184	\$13.40
Accessories	\$17,815	1,276	2,006	\$13.96

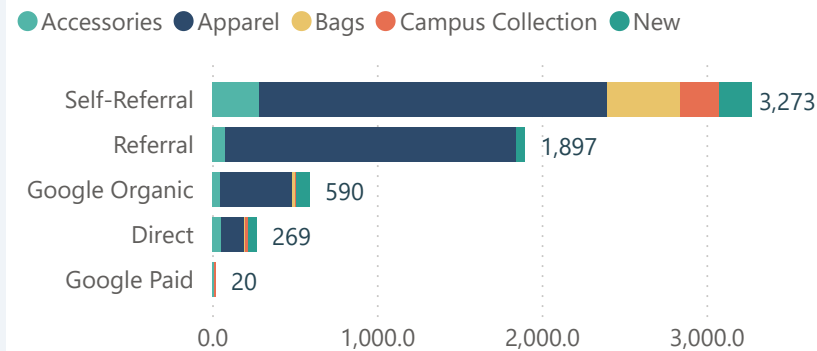

Apparel generates \$171,727 -7x more than the next category. Revenue is dangerously concentrated.

Top 5 Products by Revenue

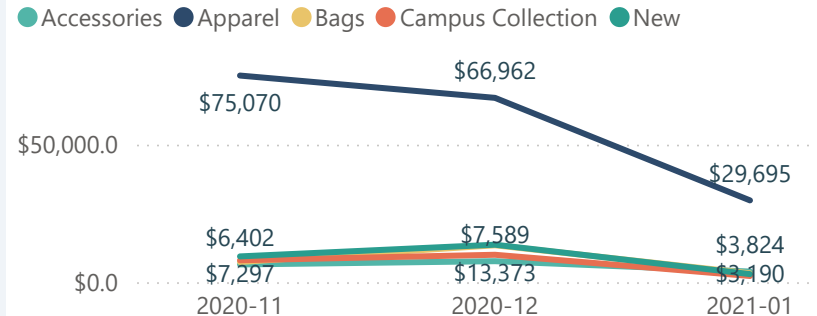

All top 5 products are Apparel - Google Zip Hoodie leads at \$13,788.

Revenue by Channel — Category Breakdown

Every channel is Apparel-dominated. Google Paid drives zero Apparel sales - missing the highest-value category entirely.

Monthly Revenue by Category

Apparel fell from \$75K in Nov to \$30K in Jan - post-holiday demand collapse. Other categories remained stable.

Category - Volume vs Value

Apparel dominates on volume (5,400+ units) — Bags punches above its weight with high AOV (\$33.89) despite low volume. Campus Collection sells high volume at low price — a different strategy entirely.
